AM-221423

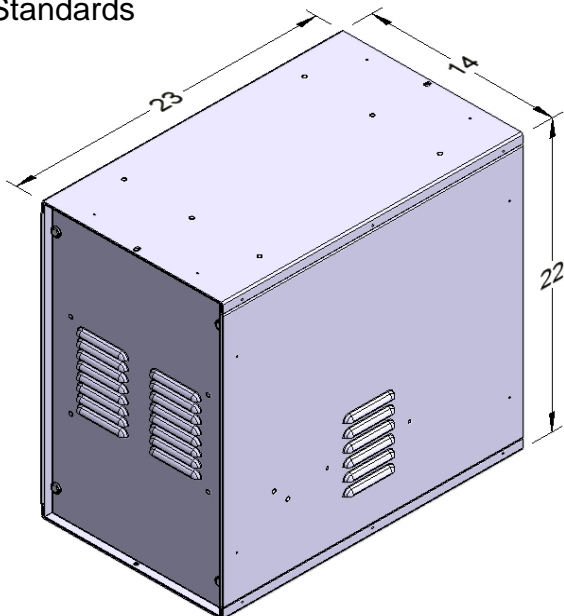

This enclosure provides additional capacity to an existing cabinet when that capacity has reached its maximum. It is retro-fitted in the field using an optional mounting template with step by step instructions and common hardware fasteners.

Common Uses:

These versatile enclosures mount to an existing site cabinet to add an extra 6 RU of rack space. This is a cost effective alternative to adding capacity with out the cost of an additional cabinet or where the site space is limited.

Specifications:

- **Size:** 22" Tall x 14" Wide x 23" Deep
- **Weight:** 60 lbs approx.
- **Ship Weight:** 85 lbs approx.
- **Material:** 16 Gauge Galvanized Steel
